GOLD BAND™ OCEANIC & SPECIALTY

## Model SS-65 - Eye/Clevis Sealed Swivel

Electroline's Model SS-65 industrial ocean surface swivel is designed for above-water applications and features an eye-end fitting and a clevis (fork/jaw) fitting. Constructed from stainless steel, the swivel has a grease-filled housing that is sealed to prevent water entry.

- Angular contact bearings provide higher-speed, low-torque rotation for longer rope lengths.
- Tapered ends are designed to prevent snags on other equipment or cables.
- Ultimate strength exceeds the rated Safe Working Load (SWL).
- Note: Model SS-65 is a reversed design of the <u>Model SS-68 Eye/Clevis Swivel</u>.
