Electro-Mechanical Cable Fitting

Part Number: EMCF List Price: Factory Quote: Please contact Electroline.

Electroline fittings have proven to be a superior method for terminating steel or single-, double-, or triple-armored conductor core cable. Most Electroline fittings can be modified for E-M cables. Utilizing the same wedging principle employed by Electroline wire rope fittings, the assembly creates a quick and easy termination with a holding strength unsurpassed by other cable terminations. Cones are manufactured from 316-grade stainless steel and passivated for superior corrosion resistance. Please contact Electroline for special requirements.
